PROJECTS

Weather App — Web-Application ↗ | React JS,HTML, CSS, JavaScript | ↗ Source Code   **2024**

- This React JS project is a basic weather application that fetches and displays weather data from the OpenWeatherMap API using Axios.
- Users can enter a location, and the app displays the current temperature, weather condition, feels like temperature, humidity, and wind speed.
- The app demonstrates core React fundamentals such as state management and conditional rendering.

Portfolio Website — Web-Site ↗ | HTML, CSS, JavaScript | ↗ Source Code   **2024**

- This project involves creating a personal portfolio website using HTML, CSS, and JavaScript.
- The website showcases the individual's skills, projects, and experience in a visually appealing and interactive manner.

Restaurant Website— Web-Site ↗ | HTML, CSS, JavaScript | ↗ Source Code   **2024**

- Implemented user authentication, product catalog, shopping cart, and checkout functionalities.
- Utilized HTML5, CSS3, JavaScript, Bootstrap to ensure visually appealing and responsive design.
- Modern frontend development techniques such as semantic HTML markup, CSS grid/flex box layout, and JavaScript event handling to enhance interactivity and usability.
